CIITS for Instructional Leaders
November 1, 2016
Workshop #031-17

GRREC Office & Training Facility • 230 Technology Way • Bowling Green, KY

KDE in partnership with GRREC is pleased to offer professional learning around the Instructional Management System of CIITS. KDE is investing more resources and training in the IMS portion of the program. CIITS is bringing together the formerly disparate functions of instruction, assessment, data analysis and reporting into a single platform, reducing complexity and increasing effectiveness in the classroom.

The learning for the day will focus on:

- Understanding what data is available to teachers
- How to access reports to monitor how students are performing
- How to generate reports to get additional information
- How to create and administer assessments to monitor student learning
- How to utilize CIITS to support instructional planning in my district
